PROPOSAL

My name is Latasha Seivright, resident of West Orange, and owner of 13 Bromley Drive. I am working with an architect to update and provide the exterior of my home with a bit of a facelift that will include changing out my siding, but more importantly, make improvements that would be more practical to my current layout, and safer for my family.

As per the site plan, focused on the front of my home, I would like to include an overhang over the new walkway (supported by columns) that would lead to a portico to the front entrance of my home. In addition to the front covered walkway, I would also like to include a new paver walkway out to Bromley Drive. This would allow my children and any visitors to my home to walk a direct path to my front door instead of walking across my lawn or through our driveway, which poses a danger and risk.

Moving to the back of my home, I would like to expand my current deck to include a lower (2 steps down), connected level that would change the setback of my current rear yard. This would change ONLY in the area where my deck is located in my yard. The other part of my yard will remain unchanged.

I hope I was able to provide you with sufficient detail regard my proposed home improvement project. Should you need additional information, please do not hesitate to contact me.

I appreciate your time.

Thank you,
Latasha Seivright
