

SUSTAINABILITY CHECKLIST FORM

	APPLICANT – PRINT OR TYPE – ALL SECTIONS TO BE COMPLETED:	TOWNSHIP OK (Date)
SUSTAINABLE BUILDING AND DESIGN STANDARDS		
Name of LEED Accredited Professional working on project:	None	
List of Energy Star and WaterSense appliances, fixtures and construction techniques:	None	
List of green and recycled building materials in new construction, renovation, and maintenance:	The Nichiha siding products typically count for 1 point under LEED v4	
Waste Management Plan for recycling and/or reuse of 60 percent of all construction and demolition of waste generated in projects larger than \$25,0000:	It is our intent to reuse 60%+/- of the existing building, it just depends on the structural integrity of the existing building systems	
Use of any water efficient landscaping:	The proposed plantings are of water efficient species.	
Use of any on-site renewable energy systems such as: (i) Solar (ii) Wind (iii) Geothermal	None	
Details of roofing materials designed to reduce the urban heat island effect such as: (i) Construction of roof top gardens to reduce solar gain in summer and insulate in winter (ii) Use of roofing materials that are no darker than a light gray or demonstrate how alternate roofing materials reduce the urban heat island effect	The new roofing will be a Duro-Last roofing (White)	
Details of any sustainable stormwater systems employed such as: (i) Bioswales/ raingardens (ii) Permeable surfaces (iii) Grey water systems (iv) Retention and detention facilities (v) Continuous trenching	Not Applicable - The proposed development results in a reduction in impervious coverage, and therefore no sustainable stormwater systems are proposed.	
A list of native and well adapted species used in landscaping to eliminate the need for fertilization and pesticides:	The proposed landscaping plan has been designed by a Licensed Landscape Architect to propose native and well adaptive species. Please refer to the Landscaping Plan of the accompanying Site Plan drawings for specific species.	

Note: Please indicate for each of the sustainable building/design items listed, the extent to which the measure is being incorporated in the project or, alternatively, indicate the reason(s) why it is not being incorporated in the project.
