LEGISLATIVE HISTORY

Luddington Road, between South Valley Road and Gregory Avenue, is a two lane roadway that is only twenty (20) feet wide and has several curves and blind spots along its length. Commuters use this road as a cut through street to quickly reach South Valley Road and the South Orange train stations from the Upper Gregory section and beyond, creating the dual hazards posed by speed and passing in opposite directions on the tight curves and narrow roadway. During the leaf season and the winter snow plowing, the road narrows even further due to piles along the sides of the road.

To eliminate these hazards, the Municipal Engineer proposes changing Luddington Road between South Valley Road and Gregory Avenue to a one way street in the westbound direction. Luddington Road west of Gregory Avenue to its terminus at the intersection with Mountain Way and Lowell Avenue is already one way westbound.
