

EMERGENCY REPAIR LEGISLATIVE HISTORY

Currently, there is no asset management plan for the Township's stormwater and sanitary sewer infrastructure, which does not allow for this type of emergency work to be anticipated. This repair is emergent which disallowed time to solicit multiple bids from contractors. This emergency work includes storm sewer reconstruction, pavement and curb restoration, removal and disposal of existing catch basin and installation of new catch basin frame and grate. Grabowski Construction, Inc. was available to complete the work in an expeditious manner since Grabowski Construction, Inc. is located in West Orange with a construction yard that has material and equipment needed to perform the emergency repair expeditiously. The aggregate dollar value of non-competitive work completed by Grabowski Construction, Inc. in the previous 12 months is \$392,690.00 which were approved by Resolution No's 295-22, 296-22, 36-23 and 317-23. This total amount includes emergency work such as reconstruction of Mellon Avenue, site clearing for emergency access at Glen Avenue culvert and emergency sanitary sewer replacement on Mitchell Street.
